AI Solutions Developer experienced in designing and implementing intelligent software systems. Skilled in **conversational AI integration**, workflow automation, and interactive platform development. **Proficient in backend development with Node.js, Python**, with hands-on **experience in large-scale data migration** across multiple sources into secure databases. A detail-oriented, self-motivated professional with strong problem-solving skills and a proven ability to thrive both independently and in fast-paced team environments.

Experience

MAR 2025 – PRESENT

Jr. Software Developer | Vectorsoft | Hyderabad, India

At VectorSoft, a product-based AI healthcare company, **developed AI-driven features** enhancing system efficiency and user engagement. Integrated conversational AI for natural patient interactions and **automated clinical transcription, reducing documentation time**. Also led a DUI education platform with interactive videos and assessments and directed large-scale data migrations to improve data accuracy and accessibility.

- Integrated Conversational AI into the product, enabling patients to interact with it through natural language.
- Developed a standalone product called DUI for individuals involved in drunk-driving cases, which presents a series of educational videos and follows up with related questions.
- Transcribed patient–physician conversations and converted them into required formats such as SOAP and DAP notes.
- Performed data migration by transferring records from PDF and Excel files to databases such as MongoDB.

Skills

Technical Skills: Node.js, Python, Next.js, Tailwind CSS, MongoDB, Local LLMs

Core Skills: Problem-Solving, Collaboration, Time Management, Team Player

Education

2020 - 2024

Bachelor of Technology, CSE – AI & ML | St. Mary's Engineering College | Hyderabad
